

# How to 'de-code' your Pilots ACRO Raw Marks Check-Sheet

This standard data describes the pilot, nationality and aeroplane details, the level and sequence being flown and the event, place and date.

The Chief Judge (with non-scoring or scoring status) and the Judges details are listed in full.

Figure numbers and K-factors and (for Free programmes) the SuperFamily for each figure.

For a non-scoring Chief Judge, the gradable figures are labelled "OK" whilst figures given a Confirmed Hard Zero are shown as "CHZ".

The Chief Judge has awarded this figure a "Confirmed Hard Zero" and any non-HZ Judges marks are accordingly boxed.

The Positioning mark and if applicable the Harmony mark are shown by their first 4 characters.

Each of the Penalty categories is listed together with the quantity given, the value of the penalty, the deduction(s) to be made in each case, and the total awarded.

The ACRO version and FairPlay settings are shown above the time and date of the report.

For information purposes only and to assist Pilots to quantify the relative value achieved in each figure, the two right-most columns display the average mark for all Judges together with the "equivalent" score.

These are NOT formal FPS steps, nor is this data used in any subsequent calculations.

An "Average" mark has been requested by this Judge, and FPS will subsequently provide a Fitted Value.

This is the maximum possible score for this sequence.

For information purposes only, the three lines in italic script quantify the possible "equivalent" pre-FPS score derived from the raw marks, and a valuation of the percentage that would be achieved by this estimation.

Again ... these are NOT formal FPS steps, nor is this data used in any subsequent calculations.
